

CIS322 Joseph's TEST PLAN

by Je Min Son

Installation Instructions

ALL the steps work

Creating the initial users

1. ERROR: **Not Found, but STEPs work fine**

The requested URL was not found on the server. If you entered the URL manually please check your spelling and try again.

BRANCH: assignment9 is working, but 10 and master is not working! I guess because on assignment 10, we are supposed to disabled the user create screen.

2. CANNOT GO OVER THIS STEP

3. CANNOT GO OVER THIS STEP

4. CANNOT GO OVER THIS STEP

5. CANNOT GO OVER THIS STEP

6. CANNOT GO OVER THIS STEP

Login to the system

1. No need for this step since we haven't created any users

2. Page load correctly

3.

4. If the username is invalid it shows invalid, also for the password, but gives

Internal Server Error, I think since I haven't created any users and just using the imported data. It gives me that there isn't rolename does not exist.

**** Maybe I am doing something wrong! However, I went back to branch 9 to create users and move on to the next steps, but create_user wasn't working either.**

Add two facilities

1. Page load successfully

2,3,4. wasn't working either. Giving me error messages.

Add two assets

1. Add asset page load successfully.
- 2.
3. This works! However, even though you successfully added, it doesn't show up on the table. Have to refresh the page to show it.

Complete the asset transit process

1. Not working
2. Not loading
3. CANNOT go over rest of the steps

Dispose of an asset

1. Not working

Run each of the reports

I have tried different branches (9,10, master) to check each steps. But I couldn't pass the steps. When I checked you app.py it seems okay but I am not sure what is wrong. I checked the error_log to see some error and could find it, but not sure for everything. However, good job for what you did so far! Cheer up and let's get this done!
